

Michael Wagner

Full Stack Developer

Michael.wagner@example.com Berlin, Germany

SUMMARY

A Full Stack Developer with **9 years of experience** driving performance, reliability and scalability of customer-facing web applications. Effectively led full stack development resulting in 25% faster loading times and improved user experience. Deployed applications to multiple cloud-based production environments, set up and maintained a relational database system, integrated third-party services and created web-based CMSs resulting in quicker information and feature updates.

EXPERIENCE

Full Stack Developer

1/2022-Present

NextGen Solutions

- During my tenure as a Full Stack Developer, being responsible for developing and maintaining comprehensive web platforms and mobile applications for a diverse range of clients, ensuring that each project met high standards of performance, usability, and security.
- implemented and optimized RESTful APIs and GraphQL data fetching methods, which significantly improved the efficiency of data communication between servers and client applications, leading to faster load times and a smoother user experience.
- The transformation of wireframes into fully responsive interfaces using Vue.js and Angular, through collaboration with UI/UX designers, resulted in highly engaging and accessible applications across multiple devices and screen sizes.
- Managed deployment pipelines utilizing Docker containers and Jenkins CI/CD workflows, which streamlined the release process and enabled rapid iteration and continuous improvement of our software products.

Frontend Developer

06/2018 - 12/2021

Innovate Web GmbH

- As a Frontend Developer, specialized in building engaging, interactive web interfaces using HTML5, CSS3, JavaScript, and React.js, focusing on creating intuitive navigation and visually appealing designs that enhanced overall user satisfaction.
- The optimization of website performance—achieved through code refactoring and the implementation of best practices to improve page load times and responsiveness—directly contributed to increased user engagement and retention.
- Close collaboration with backend teams involved integrating REST APIs and ensuring smooth data exchange, which improved application stability and responsiveness across multiple browsers and devices.
- Active participation in brainstorming sessions with designers and stakeholders to translate business requirements into functional and attractive digital experiences, along with the initiative-taking to suggest innovative UI/UX enhancements, exemplified my proactive approach.

Junior Web & Android Developer

3/2016 - 05/2018

StartUp Tech

- In my early role, supported the development of Android applications using Java and Kotlin by assisting in coding, debugging, and testing, which laid the foundation for my mobile development expertise and understanding of mobile platform nuances.
- Contributed to web development projects by working with PHP, HTML, CSS, and JavaScript, gaining valuable experience in creating responsive websites and dynamic web pages for startup clients.
- Responsibilities included conducting thorough testing and debugging of both mobile and web applications to ensure high-quality releases, as well as participating in code reviews to learn best practices from senior developers.

EDUCATION

Bachelor of Science in
Computer Science
Technical University of
Berlin

10/2012 - 02/2016

SKILLS

Web Technologies

HTML5, CSS3, JavaScript (ES6+),
TypeScript, React.js, Angular, Vue.js,
Node.js, Next.js, Tailwind.css, RESTful
APIs, GraphQL

Mobile Development

Android (Java, Kotlin), React Native,
Flutter

Tools & Platforms

Git, Docker, Jenkins, AWS, Firebase,
Azure

Databases

MongoDB, MySQL,
PostgreSQL

Other

Agile/Scrum methodologies, CI/CD
pipelines, UI/UX Design Principles
